

WANDERPORT
all things connected

Wanderport Connects all four regions of Swaziland

Our African subsidiary, [Wanderport Africa](#), has been hard at work on a mission for good - to connect hundreds of schools and public utilities to a country-wide private network and the Internet. Utilizing technology from Wanderport Networks such as our [WanderBox™](#) and disruptive technologies such as Television White Space (TVWS) Software Defined Radios (SDR), Wanderport has completed interconnections between all four regions of the Kingdom Of Swaziland.
